I've sent several emails to Rick with no response, which is unlike him
At this point the three of you travel down and meet me down there... I am meeting with Jack in the morning so just call me when you arrive at the office

I'm leaving from home as well.. I assume you will have the maps... I also assume that DNREC will be providing more information than we have at this point

Have you heard anything about how Rick is getting to DE?
Since he's on travel yesterday and today we have not heard from him – we were wondering if he told you his plans

Roberta, Andy and I are meeting at her house at 10:30.

I'll work at home for a bit in the morning before I leave.
Andy said to bring the original big maps that show Mountaire spray fields and a few of the other maps that we used to determine our geographic scope from the last time.

Is there anything you think we need that isn't electronic that would be helpful for tomorrow's meeting?
